

# Nemours Deploys Contraxx to Tackle Complex Agreements and Proactively Manage Documents

## Situation

The Nemours Foundation is one of the nation's largest health systems dedicated to the health of children. The Nemours Foundation operates the Alfred I. duPont Hospital for Children, as well as the Nemours Children's Clinic, with multiple locations in Wilmington, Delaware, Jacksonville, Orlando, and Pensacola, Florida. With multiple locations and thousands of employees, Nemours urgently needed a system by which contracts with a wide array of parties could be proactively managed.

## Solution

Nemours deployed Contraxx to manage different types of contracts from leases to complicated physician agreements. Physician agreements were particularly in need of electronic management in order to track compliance with HIPAA standards, a key driver of implementing a contract management system. Nemours also needed a way to stay current on lease and facilities agreements. Contraxx regularly reminds the contract management department, and the appropriate facilities department, of upcoming renewals and expirations, which enables them to proactively manage and negotiate terms of the renewal.

## Conclusion

Currently Nemours stores nearly 1,000 contracts in Contraxx with 100+ users. In the future, they expect to use Contraxx for the contract creation and negotiation process, which will further save the Contract Management Department time and money.
